

SR-15

The SR-15 features a powerful, high airwatt ULTRA 5.7" 2 stage flow thru motor and inverted bag filtration. The inverted bag provides a permanent filter. The SURF-Tex material which is a polyester material with acrylic latex coating. This special coating helps prevent the filter from becoming clogged and keeps efficiency at an optimum level. A plastic cone allows cyclonic action to further filter particles and helps prevent the inverted bag from becoming clogged. The SR-15 is constructed from rolled galvanized steel and powder coated for a tough, corrosion-resistant lifetime of use. Using the SR-15 can help decrease asthma and allergy symptoms by removing dust and allergens from your living areas. Vacuuming with these vacuums provides a powerful, efficient cleaning job that will rid your home of these allergy-triggering

SR-15 Power Unit Specifications	
MOTOR	5.7" ULTRA 2-Stage Flow Thru
VOLTAGE	240 A.C.
MAX AMPS	7.3
MAX WATTS	686
AIRFLOW (L/SEC at 48mm)	59.7
SEALED VACUUM (mm H ₂ O)	3541
FILTRATION	Inverted Bag
DIRT CAPACITY	23.6 Liters
DIMENSIONS OF POWER UNIT	
Diameter:	36.2 cm
Height:	98.1 cm
SOUND LEVEL	66 db

- Features & Benefits:**
- Powerful, High Airwatt Motor--High performance and better cleanability
 - Utility Valve Located on Front of Power Unit--Adds convenience by allowing you to plug directly into the power unit.
 - On/Off Switch--Manually control low voltage power to the unit, specifically when using the utility valve.
 - Inverted Bag Filtration--Provides a permanent filter to capture fine dust particles.
 - Special Filter Material--Special coating helps prevent the filter from becoming clogged and keeps efficiency at an optimum level.
 - Sound Reduction Chamber--Reduces the amount of noise coming from the motor cooling air.
